

Welcome to  
Edinburgh.

## **Hello and welcome to The Edinburgh Clinic.**

We've produced this brochure to give you a real feel for what makes our private healthcare hospital unique.

It was founded in 2008 to offer fast access for outpatient consultation, on-site diagnostic imaging, and day-case surgical treatment, all close to the heart of Scotland's capital.

Since the day we opened our doors we've been proud to deliver on our aim: to provide first-class independent healthcare for the local community in a safe, comfortable and welcoming environment; one in which we would be happy to treat our own families.

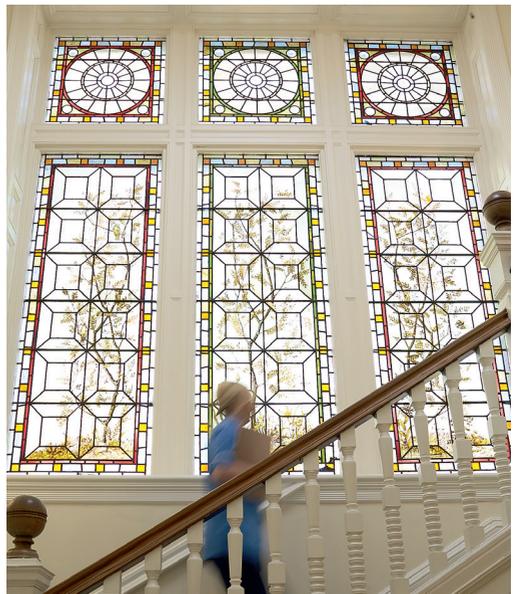

We look forward to caring for you too.

*Mr Alasdair Muir,  
Clinic Manager*

A handwritten signature in black ink, appearing to be 'Al' followed by a long, sweeping flourish.

“ From the relaxed, welcoming atmosphere to the outstanding care and professionalism, this uniquely different medical establishment could not be bettered.

*Miriam Monroe*

## The hospital that feels like home.

Number 40 Colinton Road started life in 1888 as a stunning and rather grand family home, in a leafy suburb of Edinburgh, yet only minutes from the heart of the city.

Since 2008 it has been home to The Edinburgh Clinic. It's an environment that wins praise from patients for the welcoming atmosphere.

*"Because it used to be a home it still feels homely."*

*"The building has a human scale."*

*"I wanted a place that was friendly. This doesn't feel like a hospital."*

So if you are seeking out a clinic that can offer you a whole range of treatments all under the same roof, you'll feel at home in Edinburgh.

## 19th Century outside... 21st Century inside.

Step inside our beautiful Victorian building and the first thing you notice is the open and bright spaces. Our treatment rooms are equally relaxing, thanks to the way we've retained the stunning architecture whilst installing the very latest medical equipment.

The Edinburgh Clinic is the only AfPP accredited theatre in Scotland. Our extensive imaging facilities include MRI, DEXA, CT, Ultrasound and X-Ray. We can therefore provide a quick turnaround for results (normally 48 hours compared to 2 weeks at other private hospitals in the city.) We also have a full range of eye diagnostic assessment scanners.

We'll leave the last word to a review from one of our patients *"The facilities are well laid out and comforting."*

## The quality of our people is as high as the quality of our facilities.

It's fantastic to provide our patients with state-of-the-art facilities and medical equipment.

But it's better to introduce them to the experienced medical professionals who are also of the highest calibre.

Our small and consistent team means with each return visit you can expect to meet the same smiling faces ready to greet you and treat you.

And if you need help from more than one specialist Consultant we pride ourselves on our joined up care – our teams are interdisciplinary and work together for the best outcomes for patients.

“The care and professionalism I received all the way from reception to the Consultant Ophthalmologist was outstanding. I cannot recommend The Edinburgh Clinic more highly.”

*Gordon Tainton*

“  
First class experience.  
All staff are very  
professional yet friendly  
at the same time,  
putting you at ease.  
Highly recommended.”  
Katriona Smith

## First we care. Then we aftercare.

Patient satisfaction is our number one priority. (And we're delighted that we've had some fantastic patient feedback, recently scoring 100% in answer to "would you recommend us" and we are 5 star rated on Trust Pilot.)

But the only reason we care about these results is because it proves to us that we're caring for you.

And we understand that the caring doesn't end just because the treatment might have.

Aftercare means a lot to us and we do all we can to be there for you with support after procedures. We welcome patients back with any concerns and we'll be always on hand to offer advice.

## Now, what can we do for you?

Aside from the specialities listed below we offer a wide range of other treatments and procedures. Please visit our website to find out more about all of our services at [www.edinburghclinic.com](http://www.edinburghclinic.com)

### Ophthalmology

At The Edinburgh Clinic we offer a specialist Eye Clinic where you can gain quick access to a wide range of private assessment, diagnosis and treatment services. Our extensive team of highly experienced Consultant Ophthalmologists cover a wide range of specialities. With over 5,000 cataract operations performed to date, we are experts in eye surgeries.

### Private GP Service

Choosing to see a Private GP offers you a number of benefits: In most cases same day appointments; times to suit you; longer appointments; access to female GPs; home visits; and you can see the same GP every time. We also have specialist GPs for skin concerns and sports injuries.

### Orthopaedics

Whether it's problems with your knee, foot, ankle, hand, wrist or shoulder, we can help. It doesn't matter if the cause is trauma, musculoskeletal disease or sports injury. Our Orthopaedic and Sport Injuries Clinic has a team of specialists to get you back on your feet.

### Health Screening

Our health screening services are designed to offer fast access to specialist screening and clinical assessment to check for early signs of abnormalities. Our most in-depth assessment; ScanPlus includes an MRI, blood tests and an electrocardiogram.

### Cosmetic Surgery

We offer a range of cosmetic surgical treatments, so whether you want to change the shape of your nose, have a flatter stomach, combat the signs of ageing or increase the size of your breasts, we can help. Whatever treatment you choose we'll make sure you receive all the advice and support you need.

### Vascular

We offer a range of vascular medicine and treatment at The Edinburgh Clinic with fast access to appointments with Consultant Vascular Surgeons for the assessment, diagnosis and management of health problems relating to your veins.

### Pain Management

When experiencing pain, early intervention can be a huge relief, not to mention clinically important. At The Edinburgh Clinic, we help you access holistic, specialist care with fast access to private appointments with specialist pain medicine Consultants for all aspects of chronic pain management.

### Urology

We provide a comprehensive approach to the assessment and treatment of urology concerns. Enjoy peace of mind with fast access to outpatient appointments, on-site diagnostic assessment and day-case surgery with specialist, experienced Consultant Urologists for the investigation and assessment of all urological health concerns.

## Radiology

Private diagnostic medical imaging is available with a comprehensive range of diagnostic imaging methods and image-guided treatment services, including X-ray, MRI, CT, ultrasound and also the only private DEXA scanner in Scotland for checking bone density and detection of Osteoporosis.

## Physiotherapy

Our experienced Physiotherapists provide comprehensive assessment, treatment and rehabilitation of your complete musculoskeletal health. And with access to a wide range of Consultants, medical specialities and diagnostic imaging methods, if you require further assessment or treatment we can help.

## Gynaecology

Private gynaecology appointments at The Edinburgh Clinic are available, with experienced Gynaecologists, within our calming clinical environment. Our consultants provide full assessment and management of all gynaecological and women's health concerns.

## Dermatology

Our specialist Consultant Dermatologists provide a reassuringly comprehensive service for the assessment, diagnosis and management of all skin conditions. Whether you have an itchy rash, allergy, suspicious mole, or skin blemish you would like assessed or removed, our specialists offer a complete skin service.

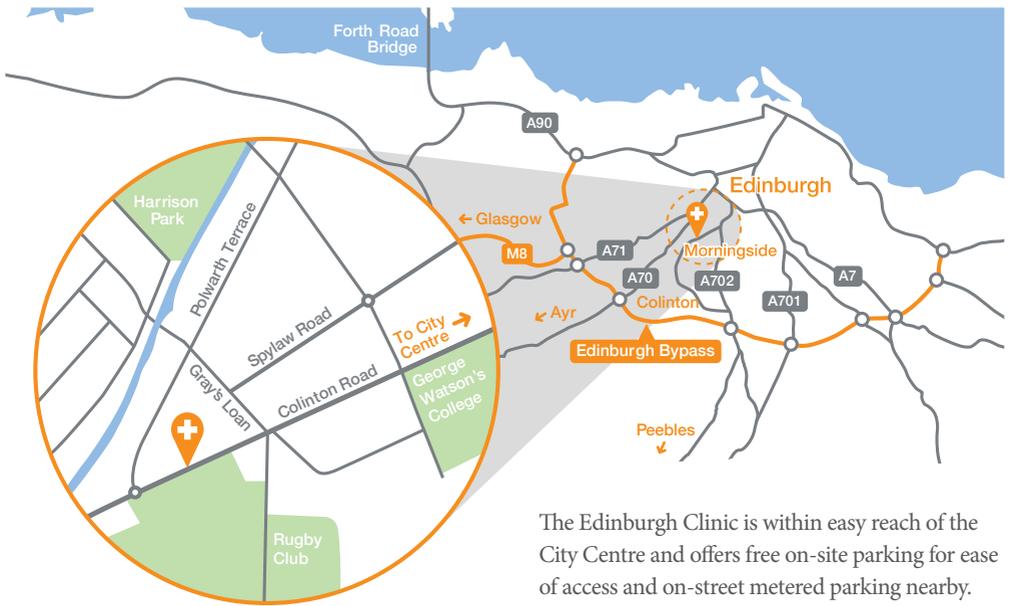

## Ear, Nose & Throat

See our Consultant ENT Surgeons for the assessment and management of all Ear, Nose and Throat (ENT) concerns. During your appointment you can discuss any concerns you have with your Consultant who will perform a full assessment, and recommend a treatment pathway.

“The outcome was more than I could have hoped for and, at 89 years old, my sight has been restored. Many thanks to all involved.”
